

if you are serious about good business

you need seriously good accounting software you need

MoneyWorks

The MoneyWorks family of accounting software provides a range of feature rich but easy-to-use solutions for small-to-medium organisations. For over ten years, MoneyWorks has been the accounting system of choice for organisations who demand a robust, high-quality accounting solution with a low cost of ownership.

Whether you are a sole trader, or have ten people just doing accounts, there is a tried and proven MoneyWorks solution for you. And all our products are upwardly compatible, so as your business grows, you can upgrade your accounting system with no need to re-input data.

It's easy to use...

MoneyWorks has been designed with simplicity and consistency in mind, which means that as you start learning you can quickly apply that knowledge to other areas of the software. Clear (configurable) entry screens make for efficient and accurate entry of information. Because MoneyWorks is fully integrated, all information, such as GST and profit, is updated automatically - no need to enter anything twice. You don't need to be a computer guru or an accountant to use MoneyWorks.

It's powerful...

Every MoneyWorks product is packed full of features that make your valuable accounting information easily accessible. Your transaction data is easily accessible using the powerful, fully searchable lists, and you can keep transactions for as long as you like. Its easy to see what you've spent where, who has purchased what, who owes you money and so forth.

It's flexible...

With a MoneyWorks package, you can operate your accounting system the way your business operates. The free form chart of accounts can be configured to reflect the structure of your organisation, and the on-screen lists can be configured to show the information that you need. You can also hook MoneyWorks up to other packages, such as FileMaker Pro, Access, and Excel to extend the functionality.

...and has a low cost of ownership

All MoneyWorks products have been designed to be intuitive, friendly and robust, so you won't need an annual support plan (nor is there a new version every year—accounting isn't that dynamic). But should you need help, it is available on our 0900 service, at the reasonable cost of just \$1.99 + GST per minute.

Discover for yourself how easy MoneyWorks is to use, and how much time you could save -

MoneyWorks provides ease-of-use, flexibility and power...

Accounting is more than counting beans

To get true value out of your accounting software, you need it to be a powerful and flexible business information system. Data entry must be fast and reliable, and it must be easy to find things once they have been entered. The package must be flexible, and able to grow as your business grows. Above all it must be reliable, and offer full accounting integrity.

MoneyWorks is more than just an accounting system. It incorporates a very powerful database providing incredibly easy ways to search, sort, and analyse your data. From the customisable user interface to the advanced relational searching, it is streets ahead of its nearest competition.

MoneyWorks presents your data (transactions, customers, products, jobs...) in live list views that allow you to search, sort, and analyse in ways simply not possible with lesser accounting software. You can operate on contiguous or discontinuous selections of records: Copy them, Export them, Print them, Sum them, Email them, Colour them, Graph them, Speak them... MoneyWorks allows you to take advantage of the full power and flexibility of a real graphical user interface.

As well as being big on features, MoneyWorks is big on integrity too. We offer you the best audit trails, the best GST processing, the best in reliability.

MoneyWorks is also fully internet savvy. Whether you want to import bank statements, pay your creditors on line, or just email invoices/statements to save postage, MoneyWorks will do it, quickly and easily.

If you have unusual invoicing or order-entry requirements, MoneyWorks can be integrated into bespoke business solutions. If you already have a custom-built database in FileMaker Pro or Access, it is not difficult to provide links into and out of MoneyWorks. You can extract information from MoneyWorks directly into Excel, and take budgets from Excel straight back into MoneyWorks. You can even run external scripts directly from the Command menu within MoneyWorks, offering real flexibility and power.

Proven growth path

It is unlikely that you will outgrow MoneyWorks—as your business expands just move up to the next level, or add another user. No data conversion or retraining—MoneyWorks is simply the most scaleable system for small-medium business.

The power of MoneyWorks Datacentre

MoneyWorks Datacentre is the ultimate accounting server software for hosting multiple accounts databases on a central server. It provides the power, features and flexibility of MoneyWorks Gold, and the convenience of non-stop server-based networking with centralised administration and true concurrent user licencing. From \$2,995 plus GST for a three user configuration.

This is an exceptional program, well written, very adaptable, fast and easily integrated with other databases

Which MoneyWorks?

MoneyWorks Cashbook (CashWorks)

\$225 + GST

An elegantly simple to use cashbook backed by the integrity of the MoneyWorks general ledger. It makes GST, bank reconciling and financial reporting easy, and is ideal for sole-traders, clubs, churches, charities—in fact any cash-based organisation.

MoneyWorks Express

\$450 + GST

The ideal solution for small organisations who need more than a cashbook. It provides full invoicing and a powerful debtors and creditors ledger, all fully integrated into the cashbook and general ledger. Includes forms (invoice) designer.

MoneyWorks Gold

\$895 + GST

MoneyWorks Gold has a wealth of features normally only found in packages costing thousands of dollars, including departmental accounting, time billing, customisable reports, purchasing, forms design and inventory.

Multi-user

\$300 + GST per additional user

MoneyWorks Gold is multi-user ready out of the box (see System Requirements below). Additional users simply need a Gold Client licence. Networks can be mixed (e.g. Mac OS X and Windows), and it runs over the internet (broadband required).

This is near perfect. Nothing comes close.
